Contents Vol. 23, 1989

A numerical cloud model study of the Hallett-Mossop ice multiplication process in strong convection
N.M. Aleksić (Belgrade, Yugoslavia), R.D. Farley and H.D. Orville (Rapid City, S.D., U.S.A.) 1
Etude de l'ajustement quadratique uniforme des estimations de pluie par radar à l'aide des mesures pluviométriques (Study of the uniform quadratic adjustment of radar rainfall estimates by rain gages)
M. Chong (Toulouse, France) and D.A. Ochou (Abidjan, Côte d'Ivoire) 31
Meteorologic and isotopic characteristics of precipitation events with implications for ground-water recharge, Southern High Plains
R. Nativ and R. Riggio (Austin, Tex., U.S.A.) 51
The collection efficiency of a cylindrical target for ice crystals
W.D. Keith and C.P.R. Saunders (Manchester, Great Britain) 83
Guide for Authors
Relationships between different forms of inorganic nitrogen in rainwater of a coastal area and ground-level gaseous nitrogen oxides
Y. Collos (L'Houmeau, France), P. Souchu and P. Tréguer (Brest, France) 97
Les sources et les puits d'oxysulfure de carbone (COS) à l'échelle mondiale (Sources and sinks of carbonyl sulphide at the global scale)
J. Servant (Toulouse, France) 105
Wind-tunnel studies of the shape of charged and uncharged water drops in the absence or presence of an electric field
A.K. Kamra and D.V. Ahire (Pune, India) 117
Spatial and temporal variations of the interior characteristics of Swiss thunderstorms
W.H. Blackmore III, D.J. Musil, P.L. Smith (Rapid City, S.D., U.S.A.) and A. Waldvogel (Zürich, Switzerland) 135
Equivalent potential temperature and dust haze forecasting at Kano, Nigeria
J.B. Omotosho (Akure, Nigeria) 163
Study of the radiative effects (long-wave and short-wave) within a fog layer
R. Vehil, J. Monerris, D. Guedalia and P. Sarthou (Toulouse, France) 179
Discussion
A convective diffusion model for the scavenging of submicron aerosol particles by snow crystals of arbitrary shapes – some comments and corrections
P.K. Wang (Madison, Wisc., U.S.A.) 195

Erratum 199
Preface 201
The influence of boundary layer clouds on radiation: a review
Y. Fouquart, J.C. Buriez and M. Herman (Villeneuve d'Ascq, France) 203
Line shape and the water vapor continuum
S.A. Clough (Cambridge, Mass., U.S.A.), F.X. Kneizys (Hanscom AFB, Mass., U.S.A.) and R.W. Davies (Waltham, Mass., U.S.A.) 229
An overview of cloud–radiation interaction studies in the U.S.S.R.
E.M. Feigelson (Moscow, U.S.S.R.) 243
Effects of radiation on clouds
P.R. Jonas (Bracknell, Berks., Great Britain) 259
Towards a surface radiation climatology: retrieval of downward irradiances from satellites
J. Schmetz (Darmstadt, F.R. Germany) 287

Effects of line shapes and line coupling on the atmospheric transmittance
D. Spänkuch (Potsdam, G.D.R.) 323
Cloud parameterization for climate modeling: status and prospects
D.A. Randall (Fort Collins, Colo., U.S.A.) 345
Non-local thermodynamic equilibrium in CO_2 in the stratosphere and mesosphere
F.W. Taylor (Oxford, Great Britain) 363
Solar irradiance variability
C. Fröhlich (Davos, Switzerland) 379
Microwave limb-sounding of Earth's upper atmosphere
J.W. Waters (Pasadena, Calif., U.S.A.) 391
